

BROADCOM
TECHNICAL CONCEPTS LLC

COMMITTED TO EXCELLENCE IN ELV SYSTEMS INTEGRATION SINCE 2008

No matter how many buildings, foundations, schools and hospitals, we build, or how many bridges we raise, all these are material entities. The real spirit behind the progress is the human spirit. The able man with his intellect and capabilities can protect these foundations and who can progress and develop with them.

Sheikh Zayed, Founder of UAE

"We cannot solve our Problems with the same thinking
we used when we created them"

- Albert Einstein

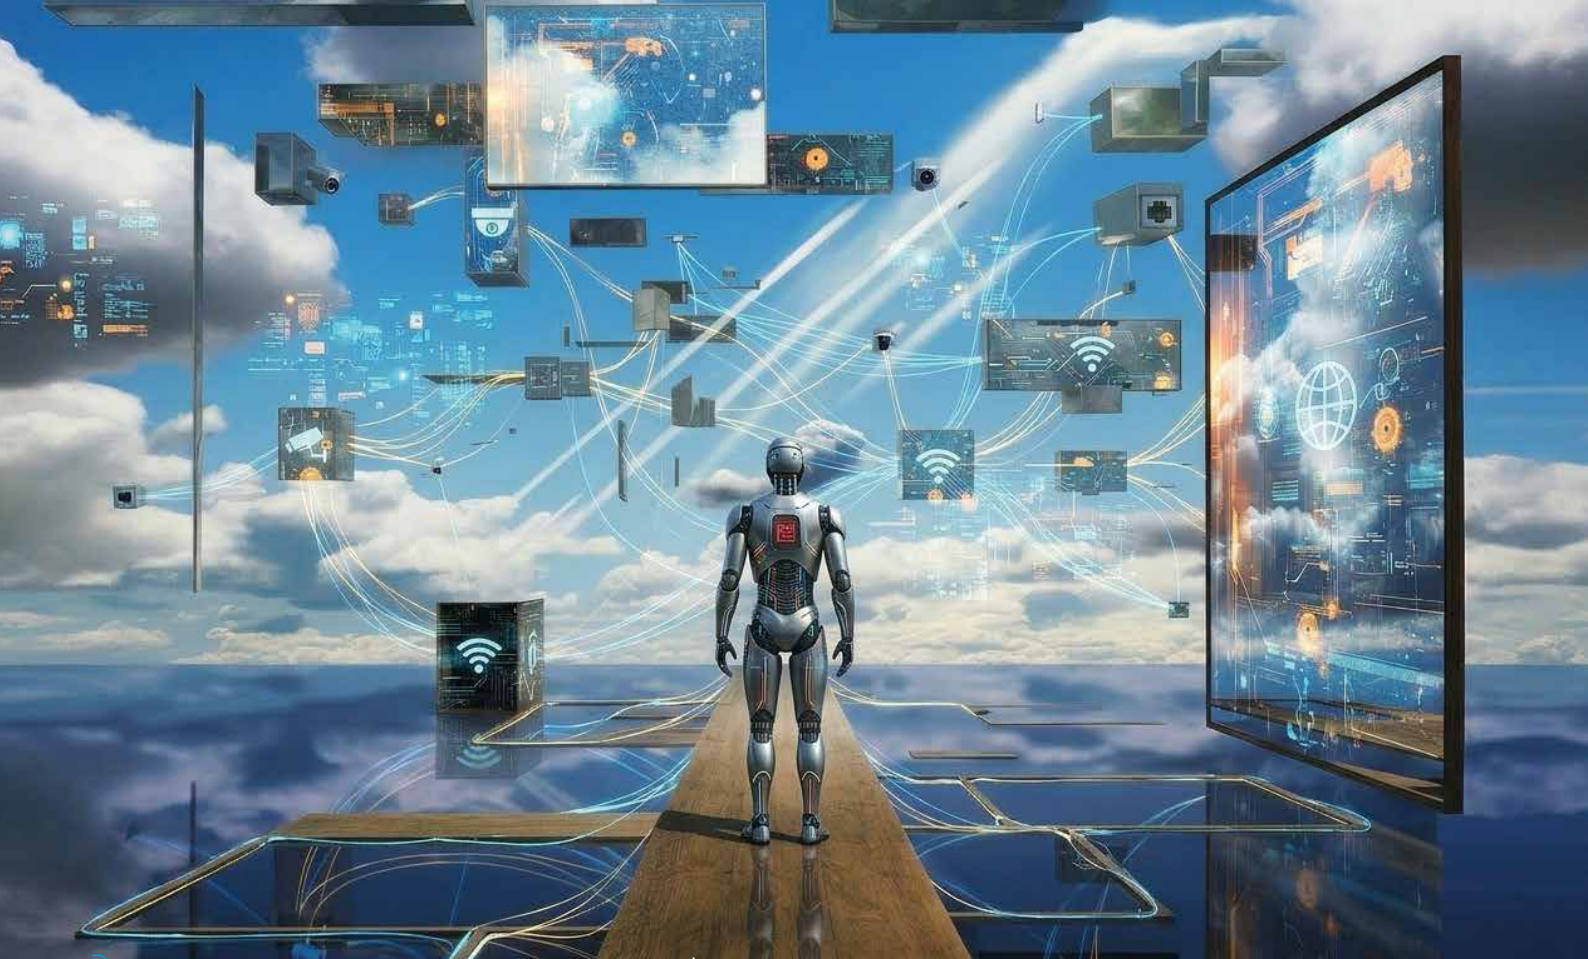

ABOUT US

We, BROADCOM TECHNICAL CONCEPTS LLC recognize that the trust of our customers is the foundation of our success. We strongly believe that delivering exceptional service and maintaining the highest standards of quality are just as important as the quality of the products and solutions we provide.

With the increasing demand for professional and efficient organizations in the fields of INFORMATION TECHNOLOGY, CCTV SECURITY SYSTEMS, AUDIO-VISUAL, HOME AUTOMATION & LIGHTING CONTROL SYSTEM, STRUCTURED CABLING SYSTEMS, BROADCOM TECHNICAL CONCEPTS LLC was established in ABU DHABI, UAE to meet these evolving industry requirements.

Our organization is committed to being a true partner to our clients. We focus on understanding our customer's needs, carefully analyzing their requirements, and delivering reliable end-to-end turnkey solutions. We combine high-quality products, technical expertise, and efficient implementation to ensure optimal performance and customer satisfaction

Think **GOOD** PERFORM BETTER &
SERVE the **BEST** to BRING CLIENTS
IMAGINATION **TRUE**

Bridging People's Dreams with Our Creativity

WHAT WE DO?

It is our aim to meet the demand of customers by providing a range of products and services which fulfill or exceed our customers needs giving value of money and low ownership. That's why we are obsessed with listening to our customers, because we are continually stayed in unison with their changing requirements.

Why CHOOSE **US**

By operating in accordance with the highest standards of business practices and quality, we strive to maintain strong and mutually beneficial relationships with our clients, suppliers, and business associates. We are committed to delivering reliable solutions and ensuring that the delivery and service requirements of every customer are met with the utmost professionalism and efficiency.

Our key commitments include:

- Competitive and market-leading pricing
- High-quality service and reliable products
- Building long-term relationships based on trust and transparency
- Designing tailor-made systems in accordance with local regulations and international technology standards

IT INFRASTRUCTURE

At BROADCOM TECHNICAL CONCEPTS LLC, we provide comprehensive IT infrastructure solutions designed to support modern business environments with reliable, secure, and scalable technology platforms. Our solutions help organizations build a strong foundation for efficient communication, data management, and business operations.

Our expertise covers the design, supply, installation, configuration, and maintenance of complete IT infrastructure systems. We deliver solutions that ensure high performance, reliability, and seamless integration with existing technologies.

Our IT infrastructure services include network design and implementation, Server and Storage solutions, Enterprise networking, Data Center Infrastructure, Structured Cabling Systems, Enterprises Wireless Networking, Cybersecurity Solutions, and System Integration.

With a team of experienced engineers and technical specialists, BROADCOM TECHNICAL CONCEPTS LLC ensures that every IT infrastructure project is delivered according to industry best practices and international standards, providing our clients with secure, future-ready, and high-performance technology environments.

We Excel-In

- Server & Storage Solutions
- Firewall Solutions
- IT Security Solutions
- Data Center Solutions
- Structured Cabling Solution

IT OUTSOURCING

Our IT outsourcing solutions are designed to reduce operational costs, improve system efficiency, and ensure the smooth operation of business-critical technologies. We offer flexible support models tailored to meet the specific requirements of each organization.

Our services include IT system maintenance, network monitoring and support, helpdesk services, server and infrastructure management,

cybersecurity support, and on-site technical assistance. Our experienced engineers and technical specialists ensure that IT systems remain secure, stable, and fully operational.

By partnering with BROADCOM TECHNICAL CONCEPTS LLC, organizations benefit from professional IT expertise, proactive system management, and reliable technical support that helps maintain productivity and business.

ENTERPRISES WIFI SOLUTIONS

We specialize in the design, deployment, configuration, and optimization of enterprise-grade wireless networks that ensure strong coverage, high capacity, and secure connectivity for multiple users and devices.

Our enterprise Wi-Fi solutions include site survey and wireless planning, high-performance access point deployment, centralized wireless controllers, network security, guest network management, and seamless roaming capabilities.

With the expertise of our trained engineers and the use of internationally recognized technology brands, BROADCOM TECHNICAL CONCEPTS LLC delivers scalable and future-ready wireless infrastructure that meets the growing connectivity demands of modern enterprises.

STRUCTURED CABLING SYSTEM

At BROADCOM TECHNICAL CONCEPTS LLC, we provide reliable and high-performance Structured Cabling Solutions that form the backbone of modern IT and communication networks. Our structured cabling systems are designed to support voice, data, video, and other integrated services with maximum efficiency and reliability. Our expertise includes both copper and fiber optic cabling solutions, ensuring robust connectivity and high-speed data transmission for organizations of all sizes. We provide end-to-end services including network design, cable installation, testing, certification, and system documentation in compliance with international standards.

Our solutions support a wide range of applications including data networks, IP surveillance systems, enterprise Wi-Fi networks, data centers, and telecommunication infrastructure. Using high-quality components and industry best practices, we ensure scalable, future-ready cabling infrastructure for commercial, residential, and enterprise environments.

With a team of experienced engineers and technicians, BROADCOM TECHNICAL CONCEPTS LLC delivers structured cabling solutions that guarantee performance, reliability, and long-term value for our clients.

ACTIVITIES & SPECIALIZED

IT INFRASTRUCTURE:

Design, Supply, Integration & support

- IT Security Solution
- Server & Firewall Solution
- Data Center Solution
- IT Outsourcing
- IP PABX System
- Enterprises Wi-Fi Solution
- Structured Cabling System

CCTV SURVEILLANCE SYSTEM:

Design, Supply, Integration & support

- ADMCC Documentation & Approval
- Annual Maintenance Contract

ACCESS CONTROL SYSTEM:

Design, Supply, Integration & support

- Biometric Access System
- Face ID Access System
- Video Intercom System

AUDIO VISUAL SYSTEM:

Design, Supply, Integration & support

- Video & Audio conferencing
- Meeting Room Solutions
- PA & BGM System
- Professional LED Displays
- Video Wall Solutions

HOME AUTOMATION & LIGHTING CONTROLS:

Design, Supply, Integration & support

- Home Automation
- Lighting Control
- HVAC Controls
- MUSIC & Video Controls

TV SYSTEM:

Design, Supply, Integration & support

- SMATV TV System RF&IF
- Digital TV System
- IP TV System

A man with a beard and safety glasses, wearing blue overalls, stands in a server room. He is holding a red and black wire cutter. To his left is a rack of tangled cables, and to his right are server racks with glowing blue lights. A large dark blue circle is overlaid on the right side of the image, containing the text.

WE CAN
BUILD IT**

AUDIO VISUAL & LED DISPLAY SOLUTIONS

At BROADCOM TECHNICAL CONCEPTS LLC, we provide comprehensive Audio-Visual (AV) integration and professional LED display solutions designed to enhance communication, collaboration, and visual experience across various environments.

Our AV integration services include meeting room solutions, conference room systems, boardroom AV setups, training room solutions, digital presentation systems, video conferencing systems, and centralized control systems

- Video & Audio Conference system
- Meeting Room Solutions
- Digital Signage
- Audio & Video Broadcasting
- PA& BGM System

We design and implement solutions that ensure seamless connectivity, high-quality audio, and crystal-clear visual performance. In addition, we specialize in professional LED display systems for indoor and outdoor applications. Our team consists of trained and experienced engineers and technicians who have successfully executed small, medium, and large-scale LED display installations across the UAE, working with several internationally recognized brands. From system design and supply to installation, configuration, and commissioning, we deliver reliable and scalable AV and LED display solutions tailored to meet the specific requirements of corporate, commercial, hospitality, and public sector projects.

Professional LED Display Solutions

Broadcom provides advanced Professional LED Display Solutions for a wide range of applications, including corporate environments, retail spaces, control rooms, event venues, and public display areas. Our solutions are designed to deliver high-quality visual performance, reliability, and seamless integration with modern AV and control systems.

Our team consists of trained and hands-on experienced engineers and technicians who specialize in the design, installation, configuration, and commissioning of professional LED display systems. With strong technical expertise, we ensure that every project is implemented according to the highest industry standards.

Broadcom has successfully completed small, medium, and large-scale LED display installations across various parts of the UAE. We have extensive experience working with many internationally recognized LED display brands, enabling us to deliver customized solutions that meet the specific requirements of each project.

ADMCC Certified Company

BROADCOM TECHNICAL CONCEPTS LLC is a certified company by the Abu Dhabi Monitoring and Control Centre (ADMCC) to design, supply, install, and maintain video surveillance systems in compliance with the regulatory standards of Abu Dhabi.

We offer complete end-to-end surveillance solutions, including system design, equipment supply, installation, configuration, commissioning, ADMCC approval support, and ongoing technical maintenance. Our solutions incorporate internationally recognized technology brands and follow industry best practices.

Our surveillance solutions include a wide range of technologies such as IP cameras, HD cameras, thermal cameras, PTZ (Pan-Tilt-Zoom) cameras, time-lapse cameras for construction and project monitoring, fencing and perimeter security cameras, and solar-powered surveillance cameras designed for remote or off-grid locations.

In addition, we provide Advanced Video Management Systems (VMS), Network Video Recorders, Remote Monitoring, and AI-based Video Analytics to improve security operations and real-time monitoring capabilities.

With a team of trained engineers and experienced technicians, BROADCOM TECHNICAL CONCEPTS LLC has successfully implemented small, medium, and large-scale surveillance projects across the UAE, delivering reliable, scalable, and fully compliant security solutions tailored to each client's requirements.

CCTV-At BROADCOM TECHNICAL CONCEPTS LLC, we provide advanced CCTV and IP Video Surveillance solutions designed to enhance safety, monitoring, and operational control across various environments. Our systems deliver high-resolution video, intelligent monitoring capabilities, and reliable performance for residential, commercial, industrial, and government facilities.

A K N X C e r t i f i e d C o m p a n y

We proudly announce that our company is certified in KNX Automation and Lighting Control Systems. This certification reflects our expertise in delivering world-class smart building solutions, including intelligent lighting control, automation, and energy-efficient system integration for residential, commercial, and hospitality projects.

Our KNX Automation and Lighting Control Systems provide a smart, reliable, and energy-efficient solution for modern buildings. KNX is an internationally recognized open standard for building automation that enables seamless integration and communication between various devices and systems, including lighting, HVAC, shading, security, and energy management.

We specialized in

By implementing KNX technology, users can centrally control and automate multiple building functions through wall-mounted keypads, touch panels, mobile applications, or centralized management software. Advanced features such as scene control, scheduling, dimming, and occupancy-based automation enhance comfort, convenience, and operational efficiency while significantly reducing energy consumption.

With our certified expertise in KNX automation, we are committed to delivering intelligent building solutions that combine advanced technology, energy efficiency, and user-friendly control—creating smarter, more sustainable environments.

The benefits of KNX

A future-proof technology - Endless flexibility and personalization - A safe and secure system - Timesaving and easy installation - An integrated and future proof solution - An international community.

UN LIMITED POSSIBILITIES

- Blinds / Curtain
- Lighting & Dimming
- Heating, Ventilation & Air condition
- Audio & Video
- Security & Door communication
- Visualization

ACCESS CONTROL SYSTEM

Our professionals are very familiar with independent and centralized Access Control system. Broadcom can do the advise, design, supply, and support for the entire projects

An Access Control System provides a reliable and efficient solution for restricting access to specific buildings or designated areas, going beyond the limitations of traditional lock-and-key mechanisms.

Modern access control solutions enhance security by allowing or denying entry through technologies such as Access Cards, PIN Codes, or Biometric Recognition Face Recognition. With a properly implemented system, organizations can effectively manage and monitor movement within their facilities.

We are also specialized Flap Barriers, Turnstile Barriers, Parking Barriers, Boom Barriers & different type automatic Barriers

At BROADCOM TECHNICAL CONCEPTS LLC, we possess extensive expertise in access control solutions and have successfully executed numerous small, medium, and enterprise-level projects, delivering reliable, scalable, and high-performance systems tailored to our clients' requirements.

SMATV SYSTEM

[ANALOG, DIGITAL & IP]

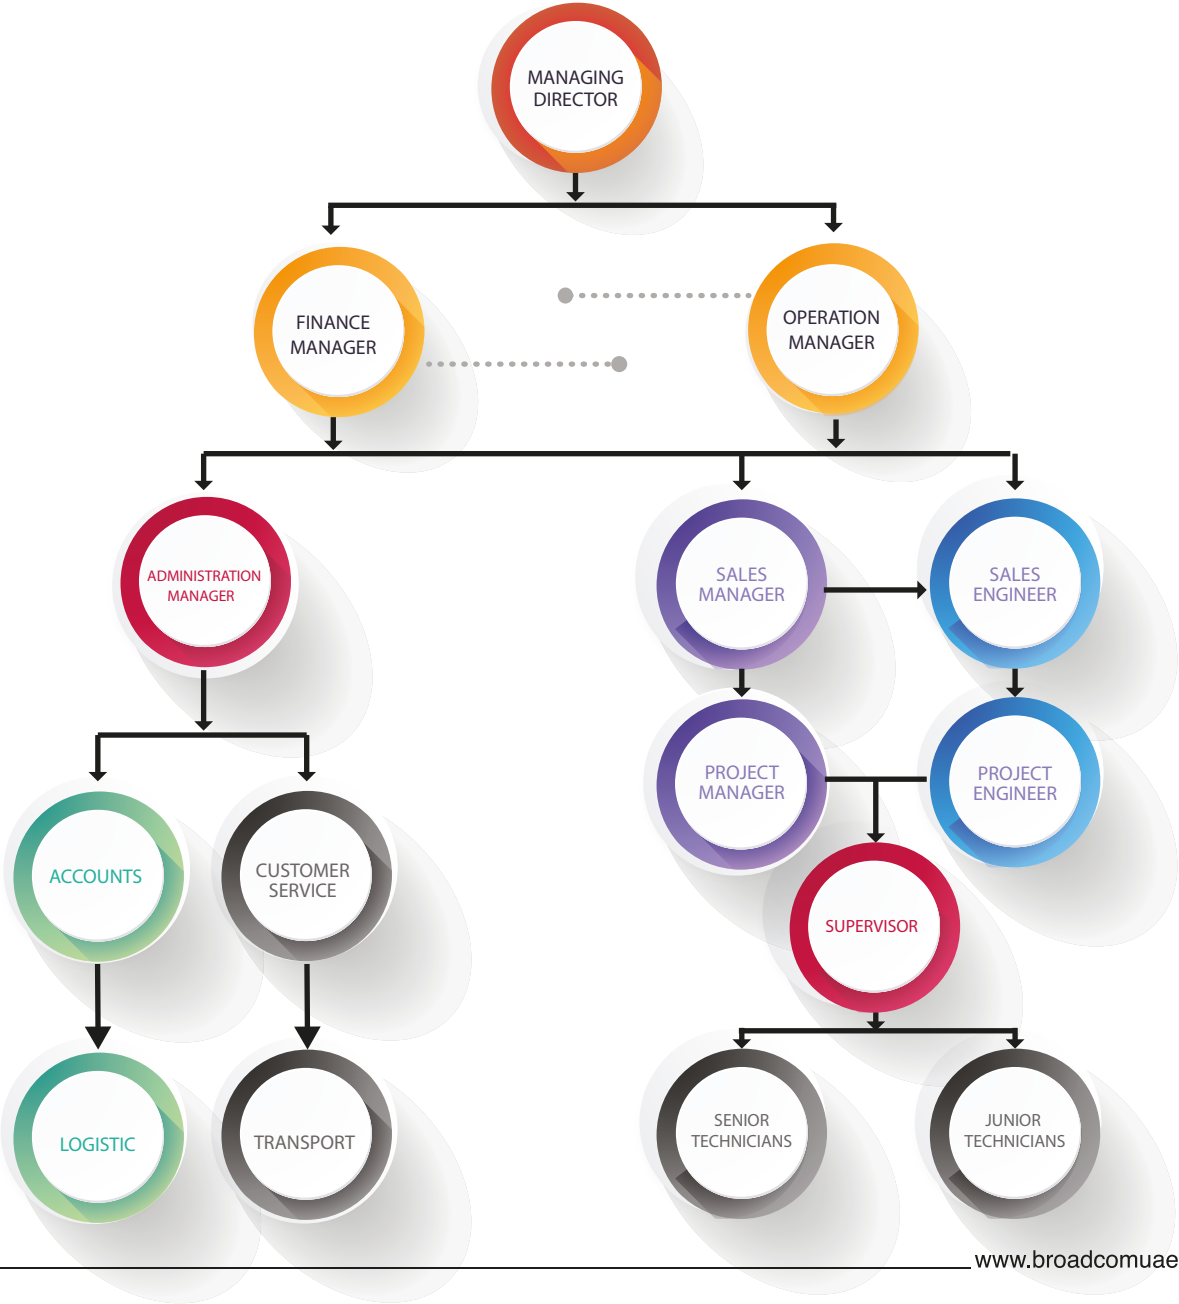

SMATV is Single Master Antenna Television (or Satellite Master Antenna Television). The purpose of SMATV is for supplying and controlling the number and type of channels to multiple televisions. Not only TV channels but FM channels as well. It provides Reception of DBS TV/FM channels for hotels, motels, dormitories, hospitals and commercial properties with multiple tenants, schools. Using a master antenna system video signals, audio signals and decoder signals can also be distributed.

There are several methods of distribution that is often used in a SMATV headend including IF TV, RFTV, DIGITAL HDTV & INTERNET PROTOCOL TV.

We are experts with residence & commercial systems, can advise, design, supply and support of entire projects.

The BROACOM organization made of family of salesman to specialist and from programmers to package managers. Below is the layout of organization with key names in the following tables.

OUR STRENGTH

- Project planning
- Build optimized structure
- Offer the best quality and price ratio
- Optimize the relations with customer
- Market leading price & Brands
- Well trained and expert staffs
- Ability of design the challenging project
